CERTIFICATIONS

Databricks Certified Data Engineer Professional
Databricks Academy · Oct. 2026 – Oct. 2028
Verify credential ↗

SKILLS

Databricks
Unity Catalog · **Delta Lake** · **Spark** · PySpark · **Spark Streaming** · MLflow · Workflows

Data Architecture
Lakehouse · Data Mesh · Data Warehouse · Data Modeling · **Data Governance** · **Data Quality**

DevOps & FinOps
Terraform · Azure DevOps · GitHub Actions · **CI/CD** · Git · **Cloud cost optimization** · Monitoring

Analytics & BI
Power BI · DAX · **SQL** · **KQL** · Log Analytics · Data Visualization

Development
Python · **PySpark** · **Scala** · SQL · C# · .NET · REST APIs

Cloud Data & Fabric
Microsoft Fabric · **Data Factory** · Data Lake · **AWS S3** · Synapse · Event Hub · Stream Analytics · Purview · Cosmos DB

Djilali **SAHRAOUI**

SOLUTION ARCHITECT / DATA ARCHITECT

PROFILE

Data Architect with 13 years of experience, expert in Databricks (AWS and Azure) and modern data architectures. I design and lead enterprise Data Platforms (Lakehouse, Unity Catalog, Data Mesh) and high-volume batch and real-time pipelines with Spark. Technical referent for Data Engineering teams in agile environments: architecture decisions, data governance and quality, cost optimization (FinOps), team upskilling and best-practice adoption.

PROFESSIONAL EXPERIENCE

ISPHERE - DATA SOLUTION ARCHITECT
2026 - Present

LFP

Data architecture of the iSphere platform, the core business IS of the French Professional Football League (clubs, players, contracts, licenses, competitions).

- Design of the platform's data architecture: Databricks Lakehouse with medallion architecture (bronze / silver / gold)
- Central role within the iSphere team: scoping data needs across business domains (clubs, players, contracts, competitions)
- Data Mesh implementation: data products per domain, data contracts
- Ingestion of iSphere events (Cosmos DB, Event Sourcing) and SQL referentials into the Lakehouse
- Data governance with Unity Catalog: cataloging, lineage, access control
- Microsoft Fabric integration: gold data exposed via OneLake, Power BI reports in Direct Lake
- Flow orchestration with Azure Data Factory and Databricks Workflows

Stack: Databricks, Microsoft Fabric, Unity Catalog, Delta Lake, Spark, PySpark, Azure Data Factory, Power BI, Cosmos DB, SQL Server, Python, SQL

LA FABRIK - DATA ARCHITECT
2022 - 2025

UP COOP

Within Up Coop's Group Data team (multinational employee benefits provider), design and leadership of "La Fabrik", the group's multi-subsidiary Data Platform: hub-and-spoke and Data Mesh architecture with a data self-service offering. Databricks Lakehouse foundation on AWS serving Power BI reporting and AI use cases.

- Design and deployment of the Databricks Data Platform on AWS (Lakehouse Architecture, S3 storage)
- Migration to Unity Catalog: centralized governance, data lineage, access control
- Development of complex ETL/ELT pipelines with Spark and PySpark (TBs of data)
- Data Quality and monitoring setup (Great Expectations, alerting)
- Data flow orchestration with Azure Data Factory and Databricks Workflows
- Data Mesh implementation: data domains per subsidiary, data products, data contracts, self-service
- Data FinOps leadership: Databricks DBU optimization, 30% cost reduction
- Platform industrialization with Terraform (IaC) and Azure DevOps / GitHub Actions CI/CD

Stack: Databricks (AWS), Unity Catalog, Delta Lake, Spark, PySpark, Azure Data Factory, AWS S3, Azure Data Lake, Event Hub, Azure OpenAI, LangChain, Power BI, Terraform, GitHub Actions, Python, Scala, SQL

EDUCATION

Master's degree in Artificial Intelligence
USTHB · 2011-2013

LANGUAGES

French
Langue maternelle

English

INTERESTS

Sports · Music · Travel

PROFESSIONAL EXPERIENCE (CONTINUED)

BMC - SENIOR DATA ENGINEER / ARCHITECT
2019 - 2021

UP COOP

- **Design of distributed ETL pipelines on Databricks for partner data**
- **Real-time processing with Spark Streaming (millions of events per day)**
- **Performance optimization: partitioning, caching, Spark tuning**
- **Data modeling: dimensional schemas, data vault, normalization**
- **Multi-source data integration: partner APIs, files, legacy databases**
- **Data monitoring with Azure Monitor, Log Analytics and KQL dashboards**
- **Secure data infrastructure: Private Endpoints, VNet Integration, encryption**
- **CQRS architecture with separated stores (SQL Database for writes, Cosmos DB for reads)**

Stack: Databricks, Spark, Spark Streaming, Delta Lake, Azure Data Factory, Cosmos DB, SQL Database, Event Hub, Azure Monitor, Log Analytics, Terraform, Python, Scala, SQL

DATA ENGINEER
2018 - 2019

YOSS / ADECCO

Creation of the YOSS platform (Adecco Group startup) connecting freelancers and large companies: data platform (ingestion, analytics) and Azure cloud services.

- Data model design and ingestion pipelines with Azure Data Factory
- Azure SQL Data Warehouse analytics store and Azure Analysis Services (SSAS) cubes for Power BI reporting
- Automated data extraction from documents (resumes, supporting documents) with Azure Cognitive Services
- Data exposure through APIs to consuming applications
- Automated deployment of data pipelines with Azure DevOps (CI/CD)

Stack: Azure Data Factory, Azure SQL Data Warehouse, Azure Analysis Services, Power BI, Cosmos DB, Cognitive Services, Azure (App Service, Functions, Service Bus), Azure DevOps, C#, ASP.NET Core, Git

TREX PROJECT - SENIOR .NET CONSULTANT & ARCHITECT
2016 - 2017

DELOITTE

Design and development of TRex, an internal tax declaration management solution for TAJ (Deloitte subsidiary).

- Microservices architecture definition deployed on Azure Service Fabric
- Backend application development in ASP.NET / Web API
- Inter-service communication through Azure Service Bus
- Contribution to the application core (cross-cutting services, tax validation logic)
- Desktop frontend development in WPF with XAML
- Azure Active Directory integration for access management

Stack: Service Fabric, Service Bus, ASP.NET, Web API, SQL Server, Azure AD, WPF, XAML, C#, .NET

CORE BANKING - .NET TECH LEAD
2013 - 2016

AGB

Technical lead for the complete redesign of a major private bank's Core Banking System, in partnership with Microsoft Consulting Services.

- Leadership of the development team (4 people)
- Core banking business logic development in collaboration with Microsoft teams
- Application infrastructure design and implementation with Windows Store App and Prism
- Secure Web APIs integration, inter-service communication via Service Bus
- Modular component development with MEF
- Rich and interactive UI development in WPF / XAML

Stack: C#, .NET 4.5, SQL Server 2014, Web API 2, Service Bus, WPF, Windows 8.1 Store App, XAML, Prism, MVVM, MEF, ADFS, TFS
